Chemical Physics

Subject index to volume 187

Methods

Theoretical

Classical mechanics

Isomeric structures, van der Waals frequencies and spectral shifts of cold 4-fluorostyrene–(argon)$_n$ clusters (n=1 to 4), S. Piccirillo, D. Consalvo, M. Coreno, A. Giardini-Guidoni, S. Douin, P. Parneix and Ph. Brechignac 187 (1994) 97

Energy dependence of the reaction cross section for the $F+H_2(v=0, j=0, 1, 2) \rightarrow HF(v')+H$ reaction from quasi-classical trajectory calculations, F.J. Aoiz, L. Bañares, V.J. Herrero and V. Sáez Rábanos 187 (1994) 227

Many body and quasiparticle approaches

A modification of non-Markovian encounter theory. I. Markovian description in non-Markovian theories, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 241

A modification of non-Markovian encounter theory. II. Exactly solvable models, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 251

Coupling schemes and perturbative treatments

Line strength in $^1\Sigma^+ \rightarrow {}^3\Sigma^-$ emissions of some diatomic radicals, G. Di Stefano, M. Lenzi, G. Piciacchia and A. Ricci 187 (1994) 49

Raman linewidths in ferroelectric $NaNO_2$, G.F. Signorini, M. Becucci and E. Castellucci 187 (1994) 263

Statistical mechanics of stationary states

Nonequilibrium solvation in chemical reactions. III. Applications of the theory, A.M. Berezhkovskii, S.A. Dudko and V.U. Zitserman 187 (1994) 275

Dipole trap model and concentration dependence of charge carrier mobility in disordered organic matrices, S.V. Novikov and A.V. Vannikov 187 (1994) 289

Non-equilibrium thermodynamic and hydrodynamic theories

Nonequilibrium solvation in chemical reactions. III. Applications of the theory, A.M. Berezhkovskii, S.A. Dudko and V.U. Zitserman 187 (1994) 275

Ab initio schemes for stationary properties

An examination of the BEBO model with the results of ab initio calculations of a reaction series, A.K. Chandra and V. Sreedhara Rao 187 (1994) 297

Computational and simulation methods
An evaluation of atomic and molecular mixture rules and group additivity concepts for the estimation of radiation absorption by long-chained, saturated hydrocarbons at vacuum UV and soft X-ray energies, J.W. Au, G. Cooper, G.R. Burton and C.E. Brion 187 (1994) 305
Neon in condensed phase: quantitative calculations of structural, thermodynamic and transport properties from pure theory, R. Eggenberger, H. Huber and M. Welker 187 (1994) 317

Molecular dynamics and scattering theory
Local excitations in statistical systems, dynamics and supercollisional effects, I. Oref 187 (1994) 163
On the dynamics of the vibrationally selective electronic energy transfer from metastable xenon atoms to nitrogen molecules, V. Aquilanti, R. Candori, F. Pirani and Ch. Ottinger 187 (1994) 171
One-atom cage effect in I_2–Ar complexes: can it be explained by linear ground-state isomers?, M.P. de Miranda, J.A. Beswick and N. Halberstadt 187 (1994) 185
Systematics of the average resonance widths in overlapping resonance-scattering and its connection with the RRKM theory, K. Someda, H. Nakamura and F.H. Mies 187 (1994) 195
Theoretical analysis of core-ionization and autoionization spectra of the CO molecule, R. Colle and S. Simonucci 187 (1994) 211
Photodissociation and predissociation processes in OH: a time-dependent quantum mechanical study, C. Kalyanaraman and N. Sathyamurthy 187 (1994) 219
Rate constants for ozone formation, A. Gross and G.D. Billing 187 (1994) 329
Molecular dynamics simulation of far infrared absorption in liquid OCS, H. Stassen and T. Dorfmüller 187 (1994) 337
Transform methods in resonance Raman scattering based on Heller theory, C. Svendsen, O.S. Mortensen and R.J.H. Clark 187 (1994) 349

Experimental

Magnetic resonances
Polarizing proton spins by electron-spin locking of photo-excited triplet state molecules, D.J. van den Heuvel, J. Schmidt and W.Th. Wenckebach 187 (1994) 365
Nature of the 9,9′-bianthryl and 10,10′-dimethoxy-9,9′-bianthryl radical anions, G. Grampp, A. Kapturkiewicz and J. Salbeck 187 (1994) 391

Infrared spectroscopy
Overtone spectroscopy of the C–H stretching mode of partially F-substituted benzenes. I. Pentafluorobenzene, M. Scotoni, S. Furlani, L. Lubich and D. Bassi 187 (1994) 3
Molecular beam infrared spectroscopy and intramolecular dynamics of SF_5CCH in the region of the fundamental and first overtone of the acetylenic CH stretch, M. Becucci, J.E. Gambogi, J.H. Timmermans, K.K. Lehmann, G. Scoles, G.L. Gard and R. Winter 187 (1994) 11
The $\nu_7+\nu_9\leftarrow\nu_7$ hot band in ethylene studied by double resonance techniques, J. Oomens, L. Oudejans, J. Reuss and A. Fayt 187 (1994) 57
LO–TO splittings, effective charges and interactions in electro-optic meta-nitroaniline crystal as studied by polarized IR reflection and transmission spectra, M.M. Szostak, N. Le Calvé, F. Romain and B. Pasquier 187 (1994) 373

Raman spectroscopy
Rotationally mediated vector correlations in the photodissociation of H_2O (1,0,0), I. Bar, D. David and S. Rosenwaks 187 (1994) 21

Raman linewidths in ferroelectric $NaNO_2$, G.F. Signorini, M. Becucci and E. Castellucci 187 (1994) 263

Visible and UV spectroscopy

Line strength in $^1\Sigma^+ \rightarrow {}^3\Sigma^-$ emissions of some diatomic radicals, G. Di Stefano, M. Lenzi, G. Piciacchia and A. Ricci 187 (1994) 49

Isomeric structures, van der Waals frequencies and spectral shifts of cold 4-fluorostyrene–$(argon)_n$ clusters ($n=1$ to 4), S. Piccirillo, D. Consalvo, M. Coreno, A. Giardini-Guidoni, S. Douin, P. Parneix and Ph. Brechignac 187 (1994) 97

Dynamics of rubidium light-induced atom desorption (LIAD), E. Mariotti, S. Atutov, M. Meucci, P. Bicchi, C. Marinelli and L. Moi 187 (1994) 111

Fluorescence-photoion-coincidence spectroscopy on inner shell excited molecules, M. Meyer, J. Lacoursière, M. Simon, P. Morin and M. Larzillière 187 (1994) 143

On the dynamics of the vibrationally selective electronic energy transfer from metastable xenon atoms to nitrogen molecules, V. Aquilanti, R. Candori, F. Pirani and Ch. Ottinger 187 (1994) 171

An evaluation of atomic and molecular mixture rules and group additivity concepts for the estimation of radiation absorption by long-chained, saturated hydrocarbons at vacuum UV and soft X-ray energies, J.W. Au, G. Cooper, G.R. Burton and C.E. Brion 187 (1994) 305

The excited state dynamics of the $\tilde{A}\ ^1B_1$ state of GeH_2 and GeD_2 radicals, K. Saito and K. Obi 187 (1994) 381

Fluorescence spectroscopy

Laser driven channels of reactive collisions in Na plus Cd vapors, M. Allegrini, G. De Filippo, F. Fuso, D. Gruber, L. Windholz and M. Musso 187 (1994) 73

State-specific collisional energy transfer in electronically excited SiF radicals: dramatic contrasts with SiCl, C.W. Watson and K.G. McKendrick 187 (1994) 79

Vibrational transition probabilities in the B–X and C–X systems of the SiF radical, C.W. Watson and K.G. McKendrick 187 (1994) 87

Fluorescence-photoion-coincidence spectroscopy on inner shell excited molecules, M. Meyer, J. Lacoursière, M. Simon, P. Morin and M. Larzillière 187 (1994) 143

Photoelectron and Auger spectroscopy

Double photoionization of CO_2, OCS, C_2H_2, CF_4, and C_6H_6 studied by threshold photoelectrons coincidence (TPEsCO) spectroscopy, R.I. Hall, L. Avaldi, G. Dawber, A.G. McConkey, M.A. MacDonald and G.C. King 187 (1994) 125

Correlation effects in the valence shells of $ZnCl_2$: a synchrotron radiation photoemission study, M. de Simone, M.Y. Adam, S. Stranges, C. Cauletti and M.N. Piancastelli 187 (1994) 137

Electron impact spectroscopy

An evaluation of atomic and molecular mixture rules and group additivity concepts for the estimation of radiation absorption by long-chained, saturated hydrocarbons at vacuum UV and soft X-ray energies, J.W. Au, G. Cooper, G.R. Burton and C.E. Brion 187 (1994) 305

Laser methods

Laser driven channels of reactive collisions in Na plus Cd vapors, M. Allegrini, G. De Filippo, F. Fuso, D. Gruber, L. Windholz and M. Musso 187 (1994) 73

State-specific collisional energy transfer in electronically excited SiF radicals: dramatic contrasts with SiCl, C.W. Watson and K.G. McKendrick 187 (1994) 79

Vibrational transition probabilities in the B–X and C–X systems of the SiF radical, C.W. Watson and K.G. McKendrick 187 (1994) 87
Excimer emission in indium vapor, P. Bicchi, C. Marinelli and R.A. Bernheim 187 (1994) 107
Dynamics of rubidium light-induced atom desorption (LIAD), E. Mariotti, S. Atutov, M. Meucci, P. Bicchi, C. Marinelli and L. Moi 187 (1994) 111

Synchrotron spectroscopies
Rotational effects in ionic reactions investigated by the ZEKE–PEPICO technique, K.-M. Weitzel, J. Mähnert and M. Penno 187 (1994) 117
Double photoionization of CO_2, OCS, C_2H_2, CF_4, and C_6H_6 studied by threshold photoelectrons coincidence (TPEsCO) spectroscopy, R.I. Hall, L. Avaldi, G. Dawber, A.G. McConkey, M.A. MacDonald and G.C. King 187 (1994) 125
Correlation effects in the valence shells of $ZnCl_2$: a synchrotron radiation photoemission study, M. de Simone, M.Y. Adam, S. Stranges, C. Cauletti and M.N. Piancastelli 187 (1994) 137
Absorption by dissociative continua in condensed matter: H_2O in rare gas and ice matrices, M. Chergui, N. Schwentner and V. Stepanenko 187 (1994) 153

Multiple resonance spectroscopy
The $\nu_7+\nu_9\leftarrow\nu_7$ hot band in ethylene studied by double resonance techniques, J. Oomens, L. Oudejans, J. Reuss and A. Fayt 187 (1994) 57

Atomic and molecular beam techniques
The ultraviolet photodissociation dynamics of pyrrole, D.A. Blank, S.W. North and Y.T. Lee 187 (1994) 35
On the dynamics of the vibrationally selective electronic energy transfer from metastable xenon atoms to nitrogen molecules, V. Aquilanti, R. Candori, F. Pirani and Ch. Ottinger 187 (1994) 171

Time-resolved experiments
Rotationally mediated vector correlations in the photodissociation of H_2O (1,0,0), I. Bar, D. David and S. Rosenwaks 187 (1994) 21
Polarizing proton spins by electron-spin locking of photo-excited triplet state molecules, D.J. van den Heuvel, J. Schmidt and W.Th. Wenckebach 187 (1994) 365
Parameter recovery and discrimination between different types of fluorescence decays obtained for dipole–dipole energy transfer in low-dimensional systems, M. Van der Auweraer, P. Ballet, F.C. De Schryver and A. Kowalczyk 187 (1994) 399

Objects

Bulk systems

Gases
Excimer emission in indium vapor, P. Bicchi, C. Marinelli and R.A. Bernheim 187 (1994) 107
Correlation effects in the valence shells of $ZnCl_2$: a synchrotron radiation photoemission study, M. de Simone, M.Y. Adam, S. Stranges, C. Cauletti and M.N. Piancastelli 187 (1994) 137
Local excitations in statistical systems, dynamics and supercollisional effects, I. Oref 187 (1994) 163
Neon in condensed phase: quantitative calculations of structural, thermodynamic and transport properties from pure theory, R. Eggenberger, H. Huber and M. Welker 187 (1994) 317
Rate constants for ozone formation, A. Gross and G.D. Billing 187 (1994) 329

Supersonic beams

Overtone spectroscopy of the C–H stretching mode of partially F-substituted benzenes. I. Pentafluorobenzene, M. Scotoni, S. Furlani, L. Lubich and D. Bassi 187 (1994) 3

Molecular beam infrared spectroscopy and intramolecular dynamics of SF_5CCH in the region of the fundamental and first overtone of the acetylenic CH stretch, M. Becucci, J.E. Gambogi, J.H. Timmermans, K.K. Lehmann, G. Scoles, G.L. Gard and R. Winter 187 (1994) 11

The $\nu_7+\nu_9\leftarrow\nu_7$ hot band in ethylene studied by double resonance techniques, J. Oomens, L. Oudejans, J. Reuss and A. Fayt 187 (1994) 57

Isomeric structures, van der Waals frequencies and spectral shifts of cold 4-fluorostyrene–$(argon)_n$ clusters ($n=1$ to 4), S. Piccirillo, D. Consalvo, M. Coreno, A. Giardini-Guidoni, S. Douin, P. Parneix and Ph. Brechignac 187 (1994) 97

Rotational effects in ionic reactions investigated by the ZEKE–PEPICO technique, K.-M. Weitzel, J. Mähnert and M. Penno 187 (1994) 117

The excited state dynamics of the $\tilde{A}\ ^1B_1$ state of GeH_2 and GeD_2 radicals, K. Saito and K. Obi 187 (1994) 381

Liquids neat

Neon in condensed phase: quantitative calculations of structural, thermodynamic and transport properties from pure theory, R. Eggenberger, H. Huber and M. Welker 187 (1994) 317

Molecular dynamics simulation of far infrared absorption in liquid OCS, H. Stassen and T. Dorfmüller 187 (1994) 337

Liquids mixtures and solutions

A modification of non-Markovian encounter theory. I. Markovian description in non-Markovian theories, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 241

A modification of non-Markovian encounter theory. II. Exactly solvable models, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 251

Crystals

–neat

Raman linewidths in ferroelectric $NaNO_2$, G.F. Signorini, M. Becucci and E. Castellucci 187 (1994) 263

LO–TO splittings, effective charges and interactions in electro-optic meta-nitroaniline crystal as studied by polarized IR reflection and transmission spectra, M.M. Szostak, N. Le Calvé, F. Romain and B. Pasquier 187 (1994) 373

–mixed

Polarizing proton spins by electron-spin locking of photo-excited triplet state molecules, D.J. van den Heuvel, J. Schmidt and W.Th. Wenckebach 187 (1994) 365

Polymers

Dipole trap model and concentration dependence of charge carrier mobility in disordered organic matrices, S.V. Novikov and A.V. Vannikov 187 (1994) 289

Thin films

Parameter recovery and discrimination between different types of fluorescence decays obtained for dipole–dipole energy transfer in low-dimensional systems, M. Van der Auweraer, P. Ballet, F.C. De Schryver and A. Kowalczyk 187 (1994) 399

Surfaces
Dynamics of rubidium light-induced atom desorption (LIAD), E. Mariotti, S. Atutov, M. Meucci, P. Bicchi, C. Marinelli and L. Moi 187 (1994) 111

Microscopic systems

Atoms
Dynamics of rubidium light-induced atom desorption (LIAD), E. Mariotti, S. Atutov, M. Meucci, P. Bicchi, C. Marinelli and L. Moi 187 (1994) 111
Energy dependence of the reaction cross section for the $F+H_2(v=0,j=0,1,2)\rightarrow HF(v')+H$ reaction from quasi-classical trajectory calculations, F.J. Aoiz, L. Bañares, V.J. Herrero and V. Sáez Rábanos 187 (1994) 227

Molecules (neutral and ionic)
Overtone spectroscopy of the C–H stretching mode of partially F-substituted benzenes. I. Pentafluorobenzene, M. Scotoni, S. Furlani, L. Lubich and D. Bassi 187 (1994) 3
Systematics of the average resonance widths in overlapping resonance-scattering and its connection with the RRKM theory, K. Someda, H. Nakamura and F.H. Mies 187 (1994) 195
Theoretical analysis of core-ionization and autoionization spectra of the CO molecule, R. Colle and S. Simonucci 187 (1994) 211
Photodissociation and predissociation processes in OH: a time-dependent quantum mechanical study, C. Kalyanaraman and N. Sathyamurthy 187 (1994) 219
A modification of non-Markovian encounter theory. I. Markovian description in non-Markovian theories, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 241
A modification of non-Markovian encounter theory. II. Exactly solvable models, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 251
Transform methods in resonance Raman scattering based on Heller theory, C. Svendsen, O.S. Mortensen and R.J.H. Clark 187 (1994) 349

–diatomic
Line strength in $^1\Sigma^+\rightarrow{}^3\Sigma^-$ emissions of some diatomic radicals, G. Di Stefano, M. Lenzi, G. Piciacchia and A. Ricci 187 (1994) 49
Laser driven channels of reactive collisions in Na plus Cd vapors, M. Allegrini, G. De Filippo, F. Fuso, D. Gruber, L. Windholz and M. Musso 187 (1994) 73
State-specific collisional energy transfer in electronically excited SiF radicals: dramatic contrasts with SiCl, C.W. Watson and K.G. McKendrick 187 (1994) 79
Vibrational transition probabilities in the B–X and C–X systems of the SiF radical, C.W. Watson and K.G. McKendrick 187 (1994) 87
On the dynamics of the vibrationally selective electronic energy transfer from metastable xenon atoms to nitrogen molecules, V. Aquilanti, R. Candori, F. Pirani and Ch. Ottinger 187 (1994) 171
Theoretical analysis of core-ionization and autoionization spectra of the CO molecule, R. Colle and S. Simonucci 187 (1994) 211
Photodissociation and predissociation processes in OH: a time-dependent quantum mechanical study, C. Kalyanaraman and N. Sathyamurthy 187 (1994) 219
Energy dependence of the reaction cross section for the $F+H_2(v=0,j=0,1,2)\rightarrow HF(v')+H$ reaction from quasi-classical trajectory calculations, F.J. Aoiz, L. Bañares, V.J. Herrero and V. Sáez Rábanos 187 (1994) 227

–small polyatomics
Molecular beam infrared spectroscopy and intramolecular dynamics of SF_5CCH in the region of the fundamental and first overtone of the acetylenic CH stretch, M. Becucci, J.E. Gambogi, J.H. Timmermans, K.K. Lehmann, G. Scoles, G.L. Gard and R. Winter 187 (1994) 11
Rotationally mediated vector correlations in the photodissociation of H_2O (1,0,0), I. Bar, D. David and S. Rosenwaks 187 (1994) 21
The $\nu_7+\nu_9\leftarrow\nu_7$ hot band in ethylene studied by double resonance techniques, J. Oomens, L. Oudejans, J. Reuss and A. Fayt 187 (1994) 57
Rotational effects in ionic reactions investigated by the ZEKE–PEPICO technique, K.-M. Weitzel, J. Mähnert and M. Penno 187 (1994) 117
Double photoionization of CO_2, OCS, C_2H_2, CF_4, and C_6H_6 studied by threshold photoelectrons coincidence (TPEsCO) spectroscopy, R.I. Hall, L. Avaldi, G. Dawber, A.G. McConkey, M.A. MacDonald and G.C. King 187 (1994) 125
Correlation effects in the valence shells of $ZnCl_2$: a synchrotron radiation photoemission study, M. de Simone, M.Y. Adam, S. Stranges, C. Cauletti and M.N. Piancastelli 187 (1994) 137
Fluorescence-photoion-coincidence spectroscopy on inner shell excited molecules, M. Meyer, J. Lacoursière, M. Simon, P. Morin and M. Larzillière 187 (1994) 143
Rate constants for ozone formation, A. Gross and G.D. Billing 187 (1994) 329
Molecular dynamics simulation of far infrared absorption in liquid OCS, H. Stassen and T. Dorfmüller 187 (1994) 337

–aromatics
The ultraviolet photodissociation dynamics of pyrrole, D.A. Blank, S.W. North and Y.T. Lee 187 (1994) 35

–other large
An evaluation of atomic and molecular mixture rules and group additivity concepts for the estimation of radiation absorption by long-chained, saturated hydrocarbons at vacuum UV and soft X-ray energies, J.W. Au, G. Cooper, G.R. Burton and C.E. Brion 187 (1994) 305

Molecular aggregates
Parameter recovery and discrimination between different types of fluorescence decays obtained for dipole–dipole energy transfer in low-dimensional systems, M. Van der Auweraer, P. Ballet, F.C. De Schryver and A. Kowalczyk 187 (1994) 399

–van der Waals molecules
One-atom cage effect in I_2–Ar complexes: can it be explained by linear ground-state isomers?, M.P. de Miranda, J.A. Beswick and N. Halberstadt 187 (1994) 185

–clusters
Isomeric structures, van der Waals frequencies and spectral shifts of cold 4-fluorostyrene–$(argon)_n$ clusters ($n=1$ to 4), S. Piccirillo, D. Consalvo, M. Coreno, A. Giardini-Guidoni, S. Douin, P. Parneix and Ph. Brechignac 187 (1994) 97
Absorption by dissociative continua in condensed matter: H_2O in rare gas and ice matrices, M. Chergui, N. Schwentner and V. Stepanenko 187 (1994) 153

Free radicals (including hydronium and muonium)
State-specific collisional energy transfer in electronically excited SiF radicals: dramatic contrasts with SiCl, C.W. Watson and K.G. McKendrick 187 (1994) 79

An examination of the BEBO model with the results of ab initio calculations of a reaction series, A.K. Chandra and V. Sreedhara Rao 187 (1994) 297
The excited state dynamics of the $\tilde{A}\ ^1B_1$ state of GeH_2 and GeD_2 radicals, K. Saito and K. Obi 187 (1994) 381
Nature of the 9,9′-bianthryl and 10,10′-dimethoxy-9,9′-bianthryl radical anions, G. Grampp, A. Kapturkiewicz and J. Salbeck 187 (1994) 391

Ions and charge carriers
Dipole trap model and concentration dependence of charge carrier mobility in disordered organic matrices, S.V. Novikov and A.V. Vannikov 187 (1994) 289

Phenomena

Vibrations and rotations of molecules
Molecular beam infrared spectroscopy and intramolecular dynamics of SF_5CCH in the region of the fundamental and first overtone of the acetylenic CH stretch, M. Becucci, J.E. Gambogi, J.H. Timmermans, K.K. Lehmann, G. Scoles, G.L. Gard and R. Winter 187 (1994) 11
Rotational effects in ionic reactions investigated by the ZEKE–PEPICO technique, K.-M. Weitzel, J. Mähnert and M. Penno 187 (1994) 117

Electronic structure and states
Vibrational transition probabilities in the B–X and C–X systems of the SiF radical, C.W. Watson and K.G. McKendrick 187 (1994) 87
Double photoionization of CO_2, OCS, C_2H_2, CF_4, and C_6H_6 studied by threshold photoelectrons coincidence (TPEsCO) spectroscopy, R.I. Hall, L. Avaldi, G. Dawber, A.G. McConkey, M.A. MacDonald and G.C. King 187 (1994) 125
Fluorescence-photoion-coincidence spectroscopy on inner shell excited molecules, M. Meyer, J. Lacoursière, M. Simon, P. Morin and M. Larzillière 187 (1994) 143
Absorption by dissociative continua in condensed matter: H_2O in rare gas and ice matrices, M. Chergui, N. Schwentner and V. Stepanenko 187 (1994) 153
The excited state dynamics of the $\tilde{A}\ ^1B_1$ state of GeH_2 and GeD_2 radicals, K. Saito and K. Obi 187 (1994) 381

Molecular interactions
Isomeric structures, van der Waals frequencies and spectral shifts of cold 4-fluorostyrene–$(argon)_n$ clusters ($n=1$ to 4), S. Piccirillo, D. Consalvo, M. Coreno, A. Giardini-Guidoni, S. Douin, P. Parneix and Ph. Brechignac 187 (1994) 97
Molecular dynamics simulation of far infrared absorption in liquid OCS, H. Stassen and T. Dorfmüller 187 (1994) 337
LO–TO splittings, effective charges and interactions in electro-optic meta-nitroaniline crystal as studied by polarized IR reflection and transmission spectra, M.M. Szostak, N. Le Calvé, F. Romain and B. Pasquier 187 (1994) 373

Spectral bandshapes and intensities
Line strength in $^1\Sigma^+ \rightarrow {}^3\Sigma^-$ emissions of some diatomic radicals, G. Di Stefano, M. Lenzi, G. Piciacchia and A. Ricci 187 (1994) 49

Vibrational transition probabilities in the B–X and C–X systems of the SiF radical, C.W. Watson and K.G. McKendrick 187 (1994) 87
Theoretical analysis of core-ionization and autoionization spectra of the CO molecule, R. Colle and S. Simonucci 187 (1994) 211
Photodissociation and predissociation processes in OH: a time-dependent quantum mechanical study, C. Kalyanaraman and N. Sathyamurthy 187 (1994) 219
Raman linewidths in ferroelectric $NaNO_2$, G.F. Signorini, M. Becucci and E. Castellucci 187 (1994) 263
An evaluation of atomic and molecular mixture rules and group additivity concepts for the estimation of radiation absorption by long-chained, saturated hydrocarbons at vacuum UV and soft X-ray energies, J.W. Au, G. Cooper, G.R. Burton and C.E. Brion 187 (1994) 305
Molecular dynamics simulation of far infrared absorption in liquid OCS, H. Stassen and T. Dorfmüller 187 (1994) 337
Transform methods in resonance Raman scattering based on Heller theory, C. Svendsen, O.S. Mortensen and R.J.H. Clark 187 (1994) 349
LO–TO splittings, effective charges and interactions in electro-optic meta-nitroaniline crystal as studied by polarized IR reflection and transmission spectra, M.M. Szostak, N. Le Calvé, F. Romain and B. Pasquier 187 (1994) 373

Coupling of electronic and nuclear motion
Line strength in $^1\Sigma^+ \rightarrow {}^3\Sigma^-$ emissions of some diatomic radicals, G. Di Stefano, M. Lenzi, G. Piciacchia and A. Ricci 187 (1994) 49

Energy transfer processes
The $\nu_7 + \nu_9 \leftarrow \nu_7$ hot band in ethylene studied by double resonance techniques, J. Oomens, L. Oudejans, J. Reuss and A. Fayt 187 (1994) 57
Laser driven channels of reactive collisions in Na plus Cd vapors, M. Allegrini, G. De Filippo, F. Fuso, D. Gruber, L. Windholz and M. Musso 187 (1994) 73
State-specific collisional energy transfer in electronically excited SiF radicals: dramatic contrasts with SiCl, C.W. Watson and K.G. McKendrick 187 (1994) 79
Local excitations in statistical systems, dynamics and supercollisional effects, I. Oref 187 (1994) 163
On the dynamics of the vibrationally selective electronic energy transfer from metastable xenon atoms to nitrogen molecules, V. Aquilanti, R. Candori, F. Pirani and Ch. Ottinger 187 (1994) 171
Polarizing proton spins by electron-spin locking of photo-excited triplet state molecules, D.J. van den Heuvel, J. Schmidt and W.Th. Wenckebach 187 (1994) 365
Parameter recovery and discrimination between different types of fluorescence decays obtained for dipole–dipole energy transfer in low-dimensional systems, M. Van der Auweraer, P. Ballet, F.C. De Schryver and A. Kowalczyk 187 (1994) 399

Molecular photophysical processes
Rotationally mediated vector correlations in the photodissociation of H_2O (1,0,0), I. Bar, D. David and S. Rosenwaks 187 (1994) 21

Intramolecular dynamics
The excited state dynamics of the $\tilde{A}\ ^1B_1$ state of GeH_2 and GeD_2 radicals, K. Saito and K. Obi 187 (1994) 381
Nature of the 9,9′-bianthryl and 10,10′-dimethoxy-9,9′-bianthryl radical anions, G. Grampp, A. Kapturkiewicz and J. Salbeck 187 (1994) 391

–radiationless transitions
Theoretical analysis of core-ionization and autoionization spectra of the CO molecule, R. Colle and S. Simonucci 187 (1994) 211

–vibrational energy redistribution (including vibrational dissociation)
Overtone spectroscopy of the C–H stretching mode of partially F-substituted benzenes. I. Pentafluorobenzene, M. Scotoni, S. Furlani, L. Lubich and D. Bassi 187 (1994) 3
Molecular beam infrared spectroscopy and intramolecular dynamics of SF_5CCH in the region of the fundamental and first overtone of the acetylenic CH stretch, M. Becucci, J.E. Gambogi, J.H. Timmermans, K.K. Lehmann, G. Scoles, G.L. Gard and R. Winter 187 (1994) 11
One-atom cage effect in I_2–Ar complexes: can it be explained by linear ground-state isomers?, M.P. de Miranda, J.A. Beswick and N. Halberstadt 187 (1994) 185
Systematics of the average resonance widths in overlapping resonance-scattering and its connection with the RRKM theory, K. Someda, H. Nakamura and F.H. Mies 187 (1994) 195

Luminescence spectra, yields and lifetimes
Parameter recovery and discrimination between different types of fluorescence decays obtained for dipole–dipole energy transfer in low-dimensional systems, M. Van der Auweraer, P. Ballet, F.C. De Schryver and A. Kowalczyk 187 (1994) 399

Non-linear responses (including optical)
LO–TO splittings, effective charges and interactions in electro-optic meta-nitroaniline crystal as studied by polarized IR reflection and transmission spectra, M.M. Szostak, N. Le Calvé, F. Romain and B. Pasquier 187 (1994) 373

Reactions (including dissociation)
Energy dependence of the reaction cross section for the $F+H_2(v=0, j=0, 1, 2)\rightarrow HF(v')+H$ reaction from quasi-classical trajectory calculations, F.J. Aoiz, L. Bañares, V.J. Herrero and V. Sáez Rábanos 187 (1994) 227
A modification of non-Markovian encounter theory. I. Markovian description in non-Markovian theories, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 241
A modification of non-Markovian encounter theory. II. Exactly solvable models, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 251
Nonequilibrium solvation in chemical reactions. III. Applications of the theory, A.M. Berezhkovskii, S.A. Dudko and V.U. Zitserman 187 (1994) 275
An examination of the BEBO model with the results of ab initio calculations of a reaction series, A.K. Chandra and V. Sreedhara Rao 187 (1994) 297

–gas phase
Rotational effects in ionic reactions investigated by the ZEKE–PEPICO technique, K.-M. Weitzel, J. Mähnert and M. Penno 187 (1994) 117
Fluorescence-photoion-coincidence spectroscopy on inner shell excited molecules, M. Meyer, J. Lacoursière, M. Simon, P. Morin and M. Larzillière 187 (1994) 143
Systematics of the average resonance widths in overlapping resonance-scattering and its connection with the RRKM theory, K. Someda, H. Nakamura and F.H. Mies 187 (1994) 195
Photodissociation and predissociation processes in OH: a time-dependent quantum mechanical study, C. Kalyanaraman and N. Sathyamurthy 187 (1994) 219

Rate constants for ozone formation, A. Gross and G.D. Billing 187 (1994) 329

–condensed phase
Absorption by dissociative continua in condensed matter: H_2O in rare gas and ice matrices, M. Chergui, N. Schwentner and V. Stepanenko 187 (1994) 153
A modification of non-Markovian encounter theory. I. Markovian description in non-Markovian theories, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 241
A modification of non-Markovian encounter theory. II. Exactly solvable models, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 187 (1994) 251
Nonequilibrium solvation in chemical reactions. III. Applications of the theory, A.M. Berezhkovskii, S.A. Dudko and V.U. Zitserman 187 (1994) 275

–photochemical
Rotationally mediated vector correlations in the photodissociation of H_2O (1,0,0), I. Bar, D. David and S. Rosenwaks 187 (1994) 21
The ultraviolet photodissociation dynamics of pyrrole, D.A. Blank, S.W. North and Y.T. Lee 187 (1994) 35
Laser driven channels of reactive collisions in Na plus Cd vapors, M. Allegrini, G. De Filippo, F. Fuso, D. Gruber, L. Windholz and M. Musso 187 (1994) 73

Electron transfer
Nature of the 9,9′-bianthryl and 10,10′-dimethoxy-9,9′-bianthryl radical anions, G. Grampp, A. Kapturkiewicz and J. Salbeck 187 (1994) 391

Ionization (including Rydberg states)
Correlation effects in the valence shells of $ZnCl_2$: a synchrotron radiation photoemission study, M. de Simone, M.Y. Adam, S. Stranges, C. Cauletti and M.N. Piancastelli 187 (1994) 137

Isotopic effects
Polarizing proton spins by electron-spin locking of photo-excited triplet state molecules, D.J. van den Heuvel, J. Schmidt and W.Th. Wenckebach 187 (1994) 365

Fluctuations and noise
Nonequilibrium solvation in chemical reactions. III. Applications of the theory, A.M. Berezhkovskii, S.A. Dudko and V.U. Zitserman 187 (1994) 275

Surface effects and catalysis
Dynamics of rubidium light-induced atom desorption (LIAD), E. Mariotti, S. Atutov, M. Meucci, P. Bicchi, C. Marinelli and L. Moi 187 (1994) 111

Thermodynamic and transport properties
Dipole trap model and concentration dependence of charge carrier mobility in disordered organic matrices, S.V. Novikov and A.V. Vannikov 187 (1994) 289
Neon in condensed phase: quantitative calculations of structural, thermodynamic and transport properties from pure theory, R. Eggenberger, H. Huber and M. Welker 187 (1994) 317

Structure of solids and liquids
Neon in condensed phase: quantitative calculations of structural, thermodynamic and transport properties from pure theory, R. Eggenberger, H. Huber and M. Welker 187 (1994) 317
